

**New McGill public lecture series on:**

## **Drugs and Health: History, Hopes and Hazards**

**Mondays 6:30 p.m. April 12 – May 24**

McIntyre Medical Sciences Building, McGill University,  
3655 Promenade Sir-William-Osler, Montreal

**Join McGill's Mini-Pharma where we'll discuss:**

-  **How new pharmaceuticals are developed**
-  **Personalized medicine: Do your genes influence which drugs you should take?**
-  **What *really* causes addiction to cigarettes?**
-  **Future health: Unleashing the potential of nanomedicine**
-  **The effects of chemicals on reproductive health**
-  **The role of big pharma in society: A panel discussion.**
